Professional Experience

- Inkubator IT - Software Engineer Associate**

Oct 2025 – Mar 2026

[Inkubator IT](#) is HMIF ITB's Software House, delivering real-world software projects for external clients under a structured consulting model.

 - Delivered [plugnidd.com](#) end-to-end, sole-owning client communication and translating **7 homepage sections** from Figma into a production **Next.js + React + Tailwind** platform with glassmorphism UI and Framer Motion animations.
 - Engineered the **PLUGNDD DNA Quiz**, a **10-question** brand personality assessment scoring across **8 dimensions**, classifying users into **4 archetypes** with personalized result pages.
 - Built a serverless **Marketing Intelligence Digest** aggregating Guardian API articles across **6 topic categories** with server-side caching, and implemented full SEO coverage spanning **6+ routes**.

Education

- Institut Teknologi Bandung - B. Sc in Informatics**

Sep 2024 - Aug 2028

 - CGPA: 3.94/4.00

Volunteer

- IT Aku Masuk ITB 2026 - Fullstack Developer**

Oct 2025 – Feb 2026

Aku Masuk ITB is ITB's annual nationwide outreach program introducing prospective students to campus life, culminating in ITB Day

 - Engineered **FindMi**, a full-stack merch e-commerce (React + Vite + Hono + Drizzle + PostgreSQL) generating **IDR 200M+** in event revenue.
 - Architected the Aku Masuk ITB event platform serving **10,000+** users — covering RSVP, multi-participant registration, barcode generation, and offline-resilient ticket display.
 - Built admin tooling for revenue analytics, QR-based OTS pickup verification, and instant ticket caching, reducing manual ops burden across 4+ departments.
- StudentxCEOs Grand Summit 15th - Fullstack Developer and IT Lead**

Feb 2026 – Present

StudentxCEOs Grand Summit is Indonesia's premier student business competition featuring BCC and MCC tracks, with **IDR 24,000,000++** in prizes and **150+ competing teams** from universities nationwide.

 - Led a **7-person** dev + UI/UX team to shipped [sxcgrandsummit.com](#) for Indonesia's premier student business competition, architecting a dual-track BCC/MCC registration system handling **150+ teams**, **450+ participants**, and **1,000+ file uploads** with Supabase Auth, Postgres, and Row-Level Security.
 - Engineered a dual-storage upload pipeline (Supabase + Google Drive API) with OAuth2/Service Account failover, team-folder automation, and Google Sheets sync, triaging **30+ feature requests** across 4 internal divisions via sprint-based GitHub workflows.

Projects & Achievements

- [Cognify](#) · Python, scikit-learn, Isolation Forest, SHAP · *Harvard HSIL Hackathon Indonesia — 4th of 241 teams Nationwide*

 - Passive ADHD relapse detector from smartphone behavioral metadata — **0.846 AUC-ROC, 77.4% F1, 4.7-day** early-warning lead time via **3-layer** anomaly framework (Z-score + Isolation Forest + SHAP); selected for further development in collaboration with SCCIC ITB and planned integration with SATUSEHAT — Indonesia's national health data platform by Kemenkes RI.
- [Vokara](#) · IndoBERTweet, FastAPI, PostgreSQL · *Hackfest 2026 — 5th Nationwide*

 - NLP-based citizen aspiration intelligence platform — **3-head** multi-task classifier (category, Asta Cita alignment, urgency) achieving **85.19% Macro F1**.
- [Virens](#) · Python, scikit-learn, Next.js 16, PostgreSQL · *IYREF 2026 — Semifinalist*

 - Nature-based carbon credit verification platform across **294 projects** — **91.53% accuracy, 90.31% Macro F1** — with a full-stack dashboard (NDVI narration, anomaly tracking, scoring) and **10-endpoint REST API**.
- [Mjolnir](#) · Go, React, TypeScript, Tailwind CSS

 - Digital library system with **image-based search via PCA** and **text recommendation via LSA/SVD** — full-stack with Go backend and React frontend, containerized with Docker and served via Nginx.
- [malam-keOS-ini](#) · C, x86 Assembly

 - 32-bit x86 OS built from scratch** — featuring Unix-like shell (**15+ commands**: cd, ls, grep, find, cp, mv, kill, ps), custom EXT2 filesystem, round-robin multitasking scheduler, VGA graphics mode (320×200, 256 colors), and Bad Apple ASCII video player.

Skills

- Languages:** Python, TypeScript, JavaScript, Go, C, C++, Java, Haskell, SQL
- Frontend:** React, Next.js, Tailwind CSS, Framer Motion, Zustand, TanStack Query
- Backend & Cloud:** FastAPI, Hono, PostgreSQL, Drizzle ORM, Supabase, Docker, Vercel
- AI/ML:** PyTorch, Hugging Face Transformers, scikit-learn, SHAP, Pandas, NumPy
- Others:** Git, Nginx, Linux, REST API, WebSocket, CI/CD
